The Cleveland Indians are 8-4 against the Chicago White Sox. They are 18-40 against the Not Chicago White Sox. Because they played Philadelphia, which is steadfastly not the Chicago White Sox, the Indians had a better than 2-in-3 chance of losing last night. So they did. The Cleveland Indians came into the game with a 4-9 record against the National League. Philadephia is in the National League, so the Indians had a better than 2-in-3 chance of losing from a different perspective. In this case, perspective is irrelevant. They could only lose once. So they did.
